## SUMMARY

Versatile AI Engineer with a passion for continuous learning and tackling new challenges across the full spectrum of AI and data. From computer vision and deep learning to data analytics and intelligent automation, I thrive on expanding my expertise into emerging domains. I design end-to-end solutions—whether building autonomous AI agents, developing predictive models, creating interactive dashboards, or architecting agentic AI systems—that transform complex problems into actionable insights and measurable business value. Proficient in Python, SQL, Power BI, and modern ML frameworks, I bring adaptability and a growth mindset to every project, consistently delivering innovation across diverse industries and use cases.

## EDUCATION

### National University of Computer and Emerging Sciences (NUCES) - FAST

B.S. in Computer Science

Islamabad, PK

Sept 2020 – July 2024

### Beaconhouse School System

O/A – Levels

Islamabad, PK

July 2015 – June 2020

## TECHNICAL SKILLS

**Programming Languages:** Python, C++, C, SQL

**Libraries & Tools:** TensorFlow, PyTorch, Keras, NumPy, Pandas, Scikit-learn, OpenCV, DVC, MLflow, Git, Docker

**Advanced Skills:** Machine Learning, Dashboards, Digital Image Processing, Feature Engineering, Data Visualization & Analysis, Statistical Analysis, Version Control & Collaboration (Git, GitHub, DVC), Containerization & Deployment (Docker, Kubernetes)

**Soft Skills:** Problem Solving, Self-Learning, Decision Making, Communication, Teamwork

## EXPERIENCE

### AI Automation & Agent Developer

German Startup (Stealth Mode)

August 2025 – Present

Germany (Remote)

- Design and deploy context-aware AI agents and automated workflows for SMB clients.
- Build data pipelines, analytics, and dashboards to drive agent decisions and measure KPIs.
- Integrate APIs, CRMs, databases, and cloud services for end-to-end automation.
- Ensure reliability with testing, monitoring, and robust error handling; produce technical docs.
- Prototype and adopt emerging AI tools to boost efficiency and business value.

### Data Scientist

Rage Solutions

July 2024 – Present

Islamabad, PK

- Engaged in hands-on experience training different LLM's using RLHF and RLEF training methods.
- Contributed to AI and Data Science, implementing and refining AI models.
- Collaborated with interdisciplinary teams, gaining practical insights into AI applications across various domains.

### AI Engineer Internship

AI/SoftDevs (Remote)

Aug 2025 – Sept 2025

Islamabad, PK

- Completed all assigned tasks, gaining hands-on experience in AI-driven automation and SaaS product development.
- Built and deployed AI-powered web applications and browser extensions, including a Prompt-to-JSON Enhancer for structured prompting.
- Implemented AI content enrichment and fact-validation pipelines and generated professional, context-rich PDF reports (AI Content-to-PDF Enhancer).
- Developed an Automated AI Posting Agent that ingests live data (stock market/news) and publishes intelligent posts to social platforms.

- Enhanced skills in AI integration, web deployment, automation, and product design for real-world SaaS applications.

### Machine Learning Intern

July 2023 – Sept 2023

Center of Excellence - Artificial Intelligence

Islamabad, PK

- Engaged in hands-on experience with cutting-edge AI technologies and tools.
- Contributed to AI research projects, implementing and refining AI models.
- Collaborated with interdisciplinary teams, gaining practical insights into AI applications across various domains.

## PROJECTS

---

### Wheat Insight (Final Year Project)

June 2023 – May 2024

Deep Learning / Machine Learning Project

Python, TensorFlow, Keras, Ultralytics, React, Flask

- Developed an integrated web platform using React and Flask for accurate wheat spike quantification and disease detection from UAV imagery.
- Implemented YOLOv8-OBb for wheat spike counting and Vision Transformers for multi-severity yellow rust classification.
- Streamlined model deployment pipeline to enable real-time analytics and stakeholder reporting.

### Air Hockey Puck Detection and Tracking

July 2024

Deep Learning Project

Python, TensorFlow, Ultralytics

- Evaluated deep learning architectures (TrackNet, YOLO) for real-time puck detection in video streams.
- Fine-tuned models using RoboFlow preprocessing to improve detection accuracy under varying lighting conditions.
- Visualized tracking metrics and movement patterns to guide iterative model enhancements.

### Fahrschule Academy Drive In – Omnichannel Automation

2025

AI Automation & Agent Developer

n8n, Chatbot, Voice AI, WhatsApp, Email, CRM

- Built an n8n-orchestrated omnichannel assistant (website chatbot, voice agent, email & WhatsApp bots) to automate leads, bookings, and FAQs.
- Integrated CRM and booking systems and instrumented analytics to improve conversion.

### Jetour KSA – Personalized Voice Agent

2025

Voice AI Developer

TTS/ASR, IVR, CRM

- Developed a localized voice agent integrated with CRM and IVR to automate lead qualification and routing.

### Voice AI Automation for SMB Operations

August 2025 – Present

AI Automation Engineer, Service Industry

Eleven Labs, n8n

- Developed a comprehensive AI automation system for a small-medium business (SMB) in Germany to address operational challenges such as high-volume inquiries, language barriers, cancellations, rescheduling, and no-shows.
- Designed and prototyped a RAG-based Voice AI Agent using Eleven Labs for voice synthesis and n8n for workflow automation, enabling autonomous handling of phone inquiries in German and English with escalation to human staff for complex queries.
- Implemented proactive notification workflows via n8n to reduce no-shows, sending automated reminders 24 hours before appointments through SMS, WhatsApp, or email.
- Prepared for a 4-week pilot by aligning metrics with client goals (e.g., fewer missed calls, lower no-show rates), demonstrating potential ROI through logged efficiencies in n8n.

### Multilingual Chatbots and RAG Integration

August 2025 – Present

AI Automation Engineer, Service Industry

Claude, GitHub Pages, n8n

- Built autonomous multilingual chatbots for the website (GitHub Pages) and WhatsApp, enabling proactive query resolution, personalized responses, and redirection to authorities or staff when needed.
- Suggested and outlined workflows for unaddressed challenges, such as automated rescheduling integrated with existing scheduling tools and a centralized dashboard for monitoring AI agents, targeting 5–10 hours/week in time savings.
- Utilized Claude for advanced LLM capabilities in RAG systems, ensuring accurate, context-aware interactions while complying with GDPR data privacy standards.

### LinkedIn Automation with AI-Generated Content

2025

Automation & Social Media Marketing

n8n, OpenAI DALL-E, LinkedIn API

- Built an end-to-end automation pipeline using n8n to generate, design, and post content to LinkedIn autonomously.
- Integrated OpenAI's image generation API to create custom visuals based on predefined templates and content themes.
- Scheduled and published posts automatically, streamlining social media presence and engagement.

### **Automated Invoice Generation System**

2025

*Business Automation*

*Google Sheets, Google Docs, Apps Script*

- Developed a fully automated invoice generation workflow using Google Sheets and Apps Script.
- Designed custom invoice templates in Google Docs that dynamically populate with client and transaction data.
- Enabled one-click invoice creation and distribution, reducing manual processing time and errors.

### **LLM Fine-Tuning with Parameter-Efficient Methods**

2025

*Machine Learning / LLM Project*

*Python, Hugging Face, LoRA, QLoRA, PEFT*

- Fine-tuned large language models using LoRA and QLoRA techniques on a custom small dataset.
- Applied parameter-efficient fine-tuning (PEFT) strategies to optimize model performance with limited data and compute resources.
- Evaluated model improvements on domain-specific tasks, demonstrating effective knowledge transfer and adaptation.

### **Contactless Fingerprint Scanner**

August 2024

*Image Processing Project*

*Python, Meta SAM-2*

- Leveraged Meta SAM-2 to segment fingers from background, enabling non-contact fingerprint capture.
- Applied advanced image-processing techniques to enhance ridge patterns for high-fidelity fingerprint recognition.

### **Kidney Stone Detection**

February 2024

*Medical Image Processing*

*Python, OpenCV*

- Segmented kidney stones from ultrasound images using thresholding and contour-based methods.
- Implemented instance segmentation and anomaly detection to identify micro-calculi and potential infections.

### **Predicting Supply-Demand Gap for Uber Car Data**

October 2023

*Artificial Intelligence Project*

*Python, scikit-learn, statsmodels*

- Analyzed temporal and spatial patterns to quantify supply-demand imbalances across cities.
- Applied classification and regression techniques for short-term demand forecasting.
- Delivered predictive insights that informed dynamic pricing strategies and fleet allocation.

### **AtliQ Employee Presence Dashboard**

March 2025

*Data Analyst, HR Management*

*Excel, Power BI*

- Cleaned and transformed real employee attendance data in Excel to ensure analysis accuracy.
- Designed an interactive Power BI dashboard with drill-downs by department, team, and date range.
- Enabled HR to pinpoint attendance hotspots and reduce unplanned absenteeism via data-driven insights.

### **AtliQ Grands Hospitality BI Rollout**

April 2025

*Data Analyst, Hospitality Industry*

*Power BI, Stakeholder Facilitation*

- Led BI requirement workshops with MD, OYO's revenue manager, and analytics experts to define metrics.
- Modeled and visualized occupancy, ADR, and RevPAR metrics in Power BI with real-time stakeholder feedback.
- Delivered dashboards providing leadership with actionable pricing and occupancy insights for revenue optimization.

### **T20 World Cup 2022 "Best XI" Analytics**

May 2025

*Data Analyst, Sports Industry*

*Python (pandas), Power BI*

- Scraped match and player data from ESPNcricinfo using Bright Data for granular performance metrics.
- Cleaned and transformed data with pandas and built a Power BI dashboard for comparative analysis.
- Ranked players on batting, bowling, and fielding KPIs to recommend the optimal "Best XI" lineup.

## CERTIFICATIONS

---

- Machine Learning Specialization (DeepLearning.AI) – Andrew Ng (Sept 2023)
- Python for Data Science, AI, and Development (IBM) (Sept 2023)
- Google AI Essentials (Google) (July 2024)
- Generative AI for Everyone (DeepLearning.AI) (July 2024)
- Preparing Data for Analysis with Microsoft Excel (Microsoft) (Jan 2025)
- Harnessing the Power of Data with Power BI (Microsoft) (Jan 2025)

## ACHIEVEMENTS

---

- Named in Dean of Honor List (7th and 8th Semester)
- Management Team Member (Fast Young Leaders Society)
- Runner Up For Best FYP Idea (AI-Inno-Fest COE-AI)
- IELTS Academic (Band Score = 7)

## LANGUAGES

---

**English:** Advanced (Full Professional Proficiency)

**Urdu:** Native (Full Professional Proficiency)

**Punjabi:** Native (Full Professional Proficiency)
