SUMMARY

AI Engineer passionate about solving diverse challenges across computer vision, deep learning, data analytics, and intelligent automation. I build end-to-end solutions—from autonomous AI agents and predictive models to interactive dashboards and agentic systems—that deliver actionable insights and measurable business impact. Proficient in Python, SQL, Power BI, and modern ML frameworks, I bring adaptability and a growth mindset to drive innovation across industries.

EDUCATION

National University of Computer and Emerging Sciences (NUCES) - FAST <i>B.S. in Computer Science</i>	Islamabad, PK Sept 2020 – July 2024
Beaconhouse School System <i>O/A – Levels</i>	Islamabad, PK July 2015 – June 2020

TECHNICAL SKILLS

Programming Languages: Python, C++, C, SQL, n8n, make.com
Libraries & Tools: TensorFlow, PyTorch, Keras, NumPy, Pandas, Scikit-learn, OpenCV, DVC, MLflow, Git, Docker, n8n
Advanced Skills: Machine Learning, Dashboards, Digital Image Processing, Feature Engineering, Data Visualization & Analysis, Statistical Analysis, Version Control & Collaboration (Git, GitHub, DVC), Containerization & Deployment (Docker, Kubernetes), Automation workflows
Soft Skills: Problem Solving, Self-Learning, Decision Making, Communication, Teamwork

EXPERIENCE

AI Automation & Agent Developer <i>Brandilyst (Stealth Mode)</i>	August 2025 – Present <i>Germany (Remote)</i>
• Design and deploy context-aware AI agents, automated workflows, and data pipelines with analytics dashboards for SMB clients. • Integrate APIs, CRMs, databases, and cloud services with robust testing, monitoring, and error handling. • Prototype and adopt emerging AI tools to boost efficiency and business value.	
Data Scientist <i>Rage Solutions</i>	July 2024 – Present <i>Islamabad, PK</i>
• Trained LLMs using RLHF and RLEF methods, implementing and refining AI models across various domains. • Collaborated with interdisciplinary teams on AI research projects and practical applications.	
AI Engineer Internship <i>AI SoftDevs (Remote)</i>	Aug 2025 – Sept 2025 <i>Islamabad, PK</i>
• Built and deployed AI-powered web applications and browser extensions, including Prompt-to-JSON Enhancer and AI Content-to-PDF Enhancer with fact-validation pipelines. • Developed Automated AI Posting Agent ingesting live data (stock market/news) and publishing intelligent posts to social platforms.	
Machine Learning Intern <i>Center of Excellence - Artificial Intelligence</i>	July 2023 – Sept 2023 <i>Islamabad, PK</i>
• Contributed to AI research projects, implementing and refining models while collaborating with interdisciplinary teams on practical applications.	

PROJECTS

RaabtaAI – Real-Time Voice AI & Omnichannel Automation Platform

2026

Full-Stack AI / Systems Engineering

Node.js, Python, Kafka, Kubernetes, PostgreSQL, Qdrant

Built a production-grade, real-time AI voice agent platform handling end-to-end phone and chat interactions using an in-house VoIP, ASR, LLM, and TTS stack.

Engineered sub-300 ms barge-in latency enabling natural, interruptible conversations in bilingual English and Gulf Arabic with seamless multi-turn dialogue.

Designed a scalable multi-tenant architecture with PostgreSQL row-level security (100+ tables), per-tenant isolation, and cross-call memory using vector databases.

Implemented multi-agent orchestration with intent classification, RAG-based knowledge retrieval, and tool integrations for bookings, CRM, and automation workflows.

Developed a microservices-based system (Node.js + Python) with Kafka event bus, real-time audio pipelines, and omnichannel support (PSTN, web, WhatsApp, SMS, email).

Ensured production reliability with 17,000+ live end-to-end tests, observability (Prometheus, Grafana, OpenTelemetry), and secure infrastructure (mTLS, Vault, JWT hardening).

Einfach Fahrschule – Multi-Tenant Driving School Chatbot

January 2026 – Present

Full-Stack AI / Backend Developer

Python, FastAPI, OpenAI, Qdrant, PostgreSQL, Docker, JavaScript

- Architected and shipped a path-based multi-tenant FastAPI chat platform serving multiple driving schools from one codebase, with per-school routes, prompts, RAG collections, and embeddable web widgets.
- Built an LLM intent classifier with structured outputs that splits user messages into atomic sub-queries and routes them to specialized agents (pricing, timings, documents, general, predefined) for accurate, policy-aligned answers.
- Implemented RAG with OpenAI embeddings and Qdrant (per-tenant collections), indexing pipelines for academy PDFs, and retrieval-augmented responses for office hours, documents, and course-specific pricing flows.
- Integrated PostgreSQL for session and message persistence, sentiment and escalation tracking, rate limiting, input sanitization, and out-of-scope handling aligned with GDPR-conscious data practices.
- Containerized the service with Docker and Docker Compose (app + Postgres, healthchecks) and documented client embed and technical deployment runbooks.

LLM Fine-Tuning with Parameter-Efficient Methods

December 2025

Machine Learning / LLM Project

Python, Hugging Face, LoRA, QLoRA, PEFT

- Fine-tuned large language models using LoRA and QLoRA techniques on a custom small dataset.
- Applied parameter-efficient fine-tuning (PEFT) strategies to optimize model performance with limited data and compute resources.
- Evaluated model improvements on domain-specific tasks, demonstrating effective knowledge transfer and adaptation.

Automated Invoice Generation System

December 2025

Business Automation

Google Sheets, Google Docs, Apps Script

- Developed automated invoice workflow using Apps Script with dynamic Google Docs templates, enabling one-click generation and distribution.

Jetour KSA – Personalized Voice Agent

November 2025

Voice AI Developer

TTS/ASR, IVR, CRM

- Developed localized voice agent with CRM and IVR integration automating lead qualification and intelligent routing for automotive client.

LinkedIn Automation with AI-Generated Content

November 2025

Automation & Social Media Marketing

n8n, OpenAI DALL-E, LinkedIn API

- Built n8n automation pipeline integrating OpenAI image generation to autonomously create, design, and schedule LinkedIn posts.

Fahrschule Academy Drive In – Omnichannel AI Automation

October 2025

AI Automation & Agent Developer

n8n, Claude, Voice AI, WhatsApp, Email, CRM, Eleven Labs

- Built n8n-orchestrated omnichannel assistant (website chatbot, voice agent, email & WhatsApp bots) automating leads, bookings, and FAQs with CRM integration and analytics.

- Developed RAG-based multilingual Voice AI Agent using Eleven Labs and Claude for autonomous phone inquiry handling in German and English with human escalation.
- Implemented proactive notification workflows reducing no-shows through automated 24-hour appointment reminders via SMS, WhatsApp, and email.
- Created autonomous multilingual chatbots for website and WhatsApp enabling proactive query resolution and personalized responses while ensuring GDPR compliance.

AtliQ Business Intelligence & Analytics Portfolio

March 2025 – May 2025

Data Analyst

Excel, Power BI, Python (pandas), Bright Data

- Designed interactive Power BI dashboards for HR attendance tracking, hospitality revenue optimization (occupancy, ADR, RevPAR), and sports analytics, enabling data-driven decision-making across industries.
- Led BI requirement workshops with stakeholders including MD and revenue managers to define metrics and deliver actionable insights for absenteeism reduction and pricing optimization.
- Scraped, cleaned, and transformed data using Python (pandas), Excel, and Bright Data to build comparative analytics dashboards with drill-down capabilities by department, date range, and performance KPIs.

Contactless Fingerprint Scanner

August 2024

Image Processing Project

Python, Meta SAM-2

- Leveraged Meta SAM-2 to segment fingers from background, enabling non-contact fingerprint capture.
- Applied advanced image-processing techniques to enhance ridge patterns for high-fidelity fingerprint recognition.

Air Hockey Puck Detection and Tracking

July 2024

Deep Learning Project

Python, TensorFlow, Ultralytics

- Evaluated deep learning architectures (TrackNet, YOLO) for real-time puck detection in video streams.
- Fine-tuned models using RoboFlow preprocessing to improve detection accuracy under varying lighting conditions.
- Visualized tracking metrics and movement patterns to guide iterative model enhancements.

Wheat Insight (Final Year Project)

June 2023 – May 2024

Deep Learning / Machine Learning Project

Python, TensorFlow, Keras, Ultralytics, React, Flask

- Developed an integrated web platform using React and Flask for accurate wheat spike quantification and disease detection from UAV imagery.
- Implemented YOLOv8-OBb for wheat spike counting and Vision Transformers for multi-severity yellow rust classification.
- Streamlined model deployment pipeline to enable real-time analytics and stakeholder reporting.

Kidney Stone Detection

February 2024

Medical Image Processing

Python, OpenCV

- Segmented kidney stones from ultrasound images using thresholding and contour-based methods.
- Implemented instance segmentation and anomaly detection to identify micro-calculi and potential infections.

Predicting Supply–Demand Gap for Uber Car Data

October 2023

Artificial Intelligence Project

Python, scikit-learn, statsmodels

- Analyzed temporal and spatial patterns to quantify supply–demand imbalances across cities.
- Applied classification and regression techniques for short-term demand forecasting.
- Delivered predictive insights that informed dynamic pricing strategies and fleet allocation.

CERTIFICATIONS

- Machine Learning Specialization (DeepLearning.AI) – Andrew Ng (Sept 2023)
- Python for Data Science, AI, and Development (IBM) (Sept 2023)
- Google AI Essentials (Google) (July 2024)
- Generative AI for Everyone (DeepLearning.AI) (July 2024)
- Preparing Data for Analysis with Microsoft Excel (Microsoft) (Jan 2025)
- Harnessing the Power of Data with Power BI (Microsoft) (Jan 2025)

ACHIEVEMENTS

- Named in Dean of Honor List (7th and 8th Semester)
- Management Team Member (Fast Young Leaders Society)
- Runner Up For Best FYP Idea (AI-Inno-Fest COE-AI)
- IELTS Academic (Band Score = 7)

LANGUAGES

English: Advanced (Full Professional Proficiency)

Urdu: Native (Full Professional Proficiency)

Punjabi: Native (Full Professional Proficiency)
